

In partnership with SCRUBS and WAMS, sixteen of our year 12 medical society students were fortunate enough to take part in a day of activities at The University of Nottingham Medical School.

They got to hear from admissions team, current medical school students, as well as taking part in a lecture on 'Life as a Surgeon'. All of these lectures provided a different insight into Medical School and provided our students with lots of useful information and thought-provoking ideas.

Students were also lucky enough to take part in a variety of workshops throughout the day, working with both current medical school students and medical professionals. Students got to take part in the suturing and hand ties workshop which provided them the opportunity to experience a practical session as they would at medical school. They also took part in a surgical specialities speed mentoring session where they got to hear stories and experiences from current surgeons, as well as a session run by Street Doctors on Accident and Emergency.

The students thoroughly enjoyed the day and gained a lot from this experience.
